

MAHBUB ALAHI MUNNA

Final-Year B.Sc. Student | Software Engineering

+8801908863619 | munna2305341396@diu.edu.bd | github.com/Mahbub-munna | [LinkedIn](#)

Dattapara, Dhaka, Bangladesh

Profile

Final-year B.Sc. student in Software Engineering at Daffodil International University with a completed major in Data Science. My journey has expanded from software development into data analysis, AI, machine learning, research, and product-oriented projects, giving me both technical and practical perspectives. These experiences have helped me understand how data, technology, user needs, and real-world problems connect to create meaningful solutions. I bring these areas together by combining software engineering, data, AI, and research with business thinking to understand opportunities, connect technology with business needs, and contribute to practical business development.

Education

Daffodil International University

Ashulia, Bangladesh

B.Sc. in Software Engineering

2023 – Present

CGPA: 3.87/4.00

Skills

Programming & Data: Python, SQL, Pandas, NumPy, Excel

AI, Analytics & Development: Machine Learning, Deep Learning, Explainable AI, Data Analysis, FastAPI, MongoDB, HTML, CSS, JavaScript, PHP, Git/GitHub

Professional: Research, Analytical Thinking, Problem-Solving, Communication, Teamwork, Leadership, Time Management, Adaptability

Research Projects

HantaXAI – Explainable Spatiotemporal Framework for Early Forecasting of Hantavirus Outbreak Emergence

Developed an explainable machine learning framework to forecast Hantavirus outbreak emergence up to **3 months in advance**. **Accepted at ICCA 2026.**

Python, Data Analysis, Machine Learning, Explainable AI

SenFloodCast – Spatio-Temporal Flood Forecasting

Explored flood forecasting by learning how flood conditions evolve over time from Sentinel-1 satellite imagery.

Python, Deep Learning, Computer Vision, Satellite Data

ECGNet-SE – Cardiovascular Disease Recognition from ECG Images

Developed a deep learning approach for recognizing cardiovascular conditions from ECG images with model evaluation and explainability.

Python, Deep Learning, Computer Vision, Explainable AI

Projects

CV Sir – Smart Resume Analyzer & Career Intelligence Platform

Built a platform that analyzes resumes and provides career-oriented insights to support job seekers.

Python, FastAPI, MongoDB, JavaScript

Shopable – E-Commerce Platform

Developed an e-commerce platform focused on product discovery, user experience, and online shopping.

Web Development, UI/UX Design, Problem-Solving

RoadCrackPrior – Road Crack Detection System

Developed a computer vision system to identify road cracks from images for infrastructure condition assessment.

Python, Computer Vision, Machine Learning, Data Processing

Archean – Galactic Life Without Sunlight

Developed an interactive game exploring life without sunlight through scientific research and interactive design.

Role: Team Lead, Research Lead, UI/UX Designer

Achievements

Dean's List Award – Daffodil International University

Recognized for academic excellence and professionalism, reflecting strong time management, leadership, communication, and consistency.

NASA Space Apps Challenge 2024 – Team Archean

Participated with Team Archean and progressed through two virtual rounds.

Certifications

Google: Gen AI: Beyond the Chatbot; Foundational Concepts; Navigate the Landscape; Gen AI Apps; Gen AI Agents

Anthropic: Claude 101 | **Other:** Machine Learning Competition Certificate

Languages

Bangla: Fluent | **English:** Fluent | **Hindi:** Basic | **Urdu:** Intermediate
